

What is **SNAX™ GO**?

Snax™ Go is a revolutionary new way to get the products **you** want when **you** want them.

Snax™ Go has 3 goals:

1. Maintain control.
2. Maintain speed.
3. Maintain a death toll of less than 1/10,000

How does it work?

Snax™ Go brings **products** to **you** by driving more than 314,000 semitrailer-trucks for 12 hours a day, 7 days a week, spread across the largest metropolitan areas in the USA (other countries coming soon.)

Turn to the next page for a visual.

Truck 1: Warm Truck

This truck carries bulk dry food, such as pasta and peanut butter. This would account for 34% of the trucks.

Truck 2: Cold Truck

This truck carries bulk cold food, such as butter and meat. This would account for 14% of the trucks.

Truck 3: Milk Truck

This truck carries milk, and water milk (skim milk). This would account for 52% of the trucks.

Top-down view of Food Truck:

To buy from the any of our Trucks, a person would simply wait for a Truck to barrel towards them at 25-35 mph, and jump on the ramp. From there, they can quickly and easily follow the marked pathway as they shop for whatever food they desire. Then, they can checkout and jump right off. Note: to conserve fuel, our Trucks never stop, instead taking right turns whenever possible and avoiding stop signs.
